ABOUT ME

A dedicated ICT graduate specializing in Software Technology at the University of Sri Jayewardenepura. Successfully completed all academic coursework and currently awaiting final results, with research work in progress. Passionate about full-stack development and building scalable web applications. Seeking opportunities to apply technical expertise in real-world projects and contribute effectively to innovative teams.

WORK EXPERIENCE

Intern Software Engineer | July 2025 - Jan 2026

Hector Kobbekaduwa Agrarian Research & Training Institute | 114, Wijerama Mw, Colombo 7

- Developed full-stack web applications using HTML, CSS, JavaScript, PHP, and MySQL.
- Implemented secure authentication and role-based access control systems.
- Designed dynamic dashboards for performance, attendance, and record management.
- Built and optimized relational databases for efficient data handling.
- Integrated frontend and backend functionalities and performed testing and debugging.
- Collaborated with team members to gather requirements and enhance system features.

EDUCATION

- BICT(Hons) Software Technology | 2022 - 2026

  Department of Information and Communication Technology
  Faculty of Technology
  University Of Sri Jayewardenepura

  Completed academic requirements – Final results pending (2026)
  Research project ongoing

- Diploma in Business Management | 2024 - 2025

  LPEC Campus

LANGUAGES

- English (Professional)
- Sinhala (Native)

PROJECTS

- **Lecture Hall Management System – MERN Stack (Group Project)**
  Built a web application to manage lecture hall scheduling, issue tracking, and real-time notifications.

- **Food Delivery Website – MERN Stack (Individual Project)**
  Developed a full-stack food delivery app with menu browsing, order placement, and delivery tracking.

- **Movie Explorer Web App – React, TMDb API (Individual Project)**
  Created a responsive movie app with search, trending updates, favorites, and detailed movie pages.

- **E-Commerce Website – Angular (Individual Project)**
  Built an Angular-based e-commerce platform with Stripe payment integration and cart management.

- **Real Estate Website – React.js (Individual Project)**
  Designed a responsive property listing website with detailed views and modern UI.

- **Movie Explorer Website - React-Js (Individual Project)**
  A responsive movie explorer built with React.js, featuring TMDb-powered search, user authentication, profile management, and YouTube trailer integration for a smooth and modern browsing experience

COURCES & CERTIFICATIONS

- Web Development for Beginners (University of Moratuwa)
- Python for Beginners (University Of Moratuwa)
- Front-End Web Development (University Of Moratuwa)
- Introduction to Software Engineering (Coursera)
- Programming Foundations with JavaScript, HTML and CSS (Coursera)
- Certificate of Certified Software Quality Assurance Tester (FSD Academy)
