ABOUT ME

A dedicated ICT graduate specializing in Software Technology at the University of Sri Jayewardenepura. Successfully completed all academic coursework and currently awaiting final results. Passionate about full-stack development and building scalable web applications. Seeking opportunities to apply technical expertise in real-world projects and contribute effectively to innovative teams.

WORK EXPERIENCE

Intern Software Engineer | July 2025 - Jan 2026

Hector Kobbekaduwa Agrarian Research & Training Institute | 114, Wijerama Mw, Colombo 7

- Developed full-stack web applications using HTML, CSS, JavaScript, PHP, and MySQL.
- Implemented secure authentication and role-based access control systems.
- Designed dynamic dashboards for performance, attendance, and record management.
- Built and optimized relational databases for efficient data handling.
- Integrated frontend and backend functionalities and performed testing and debugging.
- Collaborated with team members to gather requirements and enhance system features.

EDUCATION

- BICT(Hons) Software Technology | 2022 - 2026

Department of Information and Communication Technology

Faculty of Technology

University Of Sri Jayewardenepura

Completed academic requirements

Final results pending (2026)

- Diploma in Business Management | 2024 - 2025

LPEC Campus

LANGUAGES

- English (Professional)
- Sinhala (Native)

PROJECTS

- **Lecture Hall Management System – MERN Stack (Group Project)**
Built a web application to manage lecture hall scheduling, issue tracking, and real-time notifications.
- **Academic Accountability Tracker – Full Stack Web Application (Individual - Internship Project)**
Built a digital staff performance tracking system with role-based access, task logging, file uploads, and analytics dashboards using PHP, MySQL, HTML, CSS, and JavaScript.
- **HR Management System – Full Stack Web Application (Individual - Internship Project)**
Developed an HR management system featuring NIC-based authentication, officer management, vacancy tracking, role-based access control, and reporting dashboards using PHP, MySQL, HTML, CSS, and JavaScript.
- **Food Delivery Website – MERN Stack (Individual Project)**
Developed a full-stack food delivery app with menu browsing, order placement, and delivery tracking.
- **E-Commerce Website – Angular (Individual Project)**
Built an Angular-based e-commerce platform with Stripe payment integration and cart management.
- **Real Estate Website – React.js (Individual Project)**
Designed a responsive property listing website with detailed views and modern UI.
- **Movie Explorer Website - React-Js (Individual Project)**
A responsive movie explorer built with React.js, featuring TMDb-powered search, user authentication, profile management, and YouTube trailer integration for a smooth and modern browsing experience

COURSES & CERTIFICATIONS

- WebDevelopmentfor Beginners (Universityof Moratuwa)
- Python for Beginners (University Of Moratuwa)
- Front-End Web Development (University Of Moratuwa)
- Introduction to Software Engineering (Coursera)
- Programming Foundations with JavaScript, HTML and CSS (Coursera)
- Certificate of Certified Software Quality Assurance Tester (FSD Academy)

SKILLS

Technical Skills

- Frontend: HTML, CSS, JavaScript, React.js, Angular
- Backend: Node.js, Express.js
- Programming Languages: Java, Python, C, PHP
- Databases: MongoDB, MySQL
- Tools & Platforms: GitHub, Canva, Figma, WordPress, Adobe Photoshop & Illustrator

Soft Skills

- Time Management
- Team Collaboration
- Communication
- Adaptability to New Technologies
